

CSE-103 Class 10 Notes

CSE 103 - Class 10

Hovind Theory

The Biblical Flood and the Ice Epoch, Donald Patten book.

Genesis 1:6-8

[5] And God called the light Day, and the darkness he called Night. And the evening and the morning were the first day.

[6] And God said, Let there be a firmament in the midst of the waters, and let it divide the waters from the waters.

[7] And God made the firmament, and divided the waters which were under the firmament from the waters which were above the firmament: and it was so.

[8] And God called the firmament Heaven. And the evening and the morning were the second day.

Canopy of water above the atmosphere

Psalms 148:4

[4] Praise him, ye heavens of heavens, and ye waters that be above the heavens.

Water above the stars still?

2 Peter 3:3-5

[3] Knowing this first, that there shall come in the last days scoffers, walking after their own lusts,

[4] And saying, Where is the promise of his coming? for since the fathers fell asleep, all things continue as they were from the beginning of the creation.

[5] For this they willingly are ignorant of, that by the word of God the heavens were of old, and the earth standing out of the water and in the water:

Water under the crust of the earth.

People lived over 900 years.

Dinosaurs just very old lizards.

Genesis 6:5

[5] And GOD saw that the wickedness of man was great in the earth, and that every imagination of the thoughts of his heart was only evil continually.

You don't only think, you think about your thoughts before they happen. The imaginations of your thoughts can be evil.

Your brain has more electrical connections in it than the entire world.

Genesis 6:12

[12] And God looked upon the earth, and, behold, it was corrupt; for all flesh had corrupted his way upon the earth.

All flesh could mean animals or just men.

Teeth marks on dinosaur bones could be fighting during flood. Waters take months to rise and every one gathered in high places. People now fight for some dumb things.

Genesis 6:12

... I will destroy them with the earth.

God talks to him self

CSE-103 Class 10 Notes

God destroyed the earth too not just all men

2 Peter 3:5

[5] For this they willingly are ignorant of,

1. Heavens were of old
2. Earth standing in the water and out of the water.

If you see the word 'Therefore' you better find out what is there fore. Same as 'whereby'?

'earth' and 'world' used interchangeably

Why didn't God just say 'Die' and every one dies. Why did he use a flood?

Hugh Ross - Local flood - every profit needs a platform to preach from and Noah's was the boat

Tell Noah to move.

1. Flood leaves evidence.

Later generations would believe Noah when he said that he was a only survivor of a flood that killed everyone.

26000 ft above sea level on top of Mt. Everest there are fossils found.

2. Flood reminds us of the consequences of our sin.

Fossils, Grand Canyon, Fault lines should remind us of our sin

When kids look at these things it should remind them that God hates sin.

3. Gave people time to repent

Genesis 6:3

[3] And the LORD said, My spirit shall not always strive with man, for that he also is flesh: yet his days shall be an hundred and twenty years.

God gave Noah 120 years warning

Lamech had many sons and daughters.

Noah's brothers and sisters did not believe him.

Ice age - what would it take to freeze a mammoth standing up?

If all of the water in the atmosphere condensate it would probably produce 2? of rain.

Pangaea theory - South America and Africa look like they would fit together

Fact: similar fossils are found in South America and Africa

Africa shrunk 35-40% to fit

A calculation of percentage can be deceiving. Cut a paper in half and it is not 50% of paper just 50% of the surface area

They remove Mexico and Central America to make it work.

They had to twist Africa and South America opposite directions to fit

They miss the most obvious thing that there is dirt under the water

You could prove both sides of a river are parallel however that does not mean that one time they were connected. They are still connected just lower.

Magnetic reversals

Cretin stones will pick up magnetic fields and hold them.

Opposites attract (accept in San Francisco)

No one knows how the earth has a magnetic field

CSE-103 Class 10 Notes

Causes the northern lights
Ring around the North pole
same as florescent lamps
Charged particles from the sun fluoresce in the atmosphere
Magnetic field causes compasses to point North

Electricity running through a wire causes a magnetic field
A moving magnetic field causes electricity in a wire.
No one knows how the magnetic field exists or how it could have reversed.

Rock melted like magma and the iron flows like water and the magnetic field pulls it in a line pointing North.

Boats in middle of ocean coring holes and checking magnetic strength in cores.
Many samples across the bottom of ocean floor
Made a chart graph showing where it was stronger and weaker and saw a pattern. Someone drew a line through the middle of the chart and said that everything below the line was a reversal.
1800's Gauss figured out how to measure the strength of the earth's magnetic field.
Electromagnets - Junk yard, power locks
Earth's field has been loosing strength. 6% in the last 150 years
If the magnetic field was too strong it would have killed life on earth
Thomas Barnes - calculated the maximum age of earth to 25,000 years
Evolutionists don't like that because they don't want to limit the age of the earth.
Some planets have strong magnetic field and some don't.

Fact: the earth's magnetic field is decreasing
They say there are reversals because there is no other option for them.

Psalms 24:1-2

[1] The earth is the LORD's, and the fulness thereof; the world, and they that dwell therein.

[2] For he hath founded it upon the seas, and established it upon the floods.

Psalms 136:6

[6] To him that stretched out the earth above the waters: for his mercy endureth for ever.

Water under the earth's crust.

Fountains opened first then the windows of heaven.

Atmosphere won't hold enough water to flood earth

Latent heat of condensation

When water condensates it produces heat

If it rained for 40 days enough water to cover Mt. Everest the heat released would destroy all life on earth.

1 drop of water would cover the earth if spread thin enough.

Fly over the top of ocean.

Pacific ocean 11,000 miles wide at equator. 64 million square miles. And that is just the surface.

There is enough water on the planet that if you flattened out the mountains and valleys the water would be 1.5 miles deep.

Flood was not caused by rain.

CSE-103 Class 10 Notes

Water kept coming up for 150 days

Put a grape in the sun. Water evaporates but the skin stays the same size.

Crust of earth wrinkles up when water left.

Walt Brown - In the Beginning (Book)

Hydroplate theory

High speed film of balloon popping. Tear spreads around surface of balloon as popping. Earth quake same way.

Weight of crust of the earth on all the water below forces water out crack 10 to 20 miles up as crack races around the surface of the earth.

Crack gets wider because of erosion.

Push a mattress on its sides and it bulges in middle. Rock surface does the same thing.

Basalt pushes up in the middle and causes the contents to push apart. Basalt lifted up until the pressure equalizes.

Still large sections of water under crust called aquifers.

Put magnet in oven and it will loose its strength. If cooled in earths magnetic field it will return if pointed North/South. Basalt hot and cools with water rushing back in locking in magnetic signature and depending on situation cause it to be stronger or weaker.

San Andreas fault, Hayward fault,

Compass will always point North on ocean floor

Fact: Earth has cracks

How did they get there?

Slip fault

Two plates moving horizontal in opposite directions. Jerking as tension is released is earth quakes.

Strike fault

Two plates moving vertical and one going up the other down into hot core - subduction

Rain storms, mud slides, erosion, etc.

Dirt always goes down never up. It will eventually all wind up in the oceans.

The rock at bottom of pacific ocean is covered by some dirt.

They can calculate how long the dirt has been accumulating and winds up being only several thousand years.

A pond gets a little dirt in it each year and eventually if let alone will fill up.

Evolutionists claim that the floor is going down at edges and coming up in middle so the bottom is always being recycled and constantly renewing its self.

Contents are supposedly moving as fast as fingernails grow. 1 inch a year or so.

Satellite in parking orbit. Lasers from America and Europe measure angle and calculate if the contents are moving. A larger angle means further apart and smaller angle means closer together.

Atmospheric distortion can come up to .046 arc seconds of distortion through the air.

After 8 years of measuring they found no movement.

Since they knew there was a possibility for error due to atmosphere of up to 3 inches they said that

CSE-103 Class 10 Notes

it must have moved 3 inches but they could not measure it.

Maybe they are moving. It does not matter.

Take the water out there is still dirt underneath.

Plates move. That does not prove they always moved or at the same rate.

Car going on I10 East. Does that prove he started in California several days ago?
